PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of professional experience building responsive web applications with Angular, React, TypeScript and Bootstrap, plus hands-on Spring Boot, Spring Data JPA and PostgreSQL work from an ongoing bootcamp and a Spring Boot + Angular project. Delivered 7 websites for enterprise, corporate and government clients, integrated REST APIs and resolved STQC accessibility issues.

WORK EXPERIENCE

Prath Tech Private Limited – Software Engineer — **January 2026 – Present**

Key Responsibilities	• Built and maintained 5 responsive websites (real estate, steel industry, corporate and 2 government portals) using HTML5, CSS3, JavaScript, Bootstrap, React and Angular. • Created reusable, cross-browser-compatible UI components, integrated REST APIs and optimized page load speed. • Partnered with UI/UX designers and backend developers using Git and Postman to ship features in Agile sprints.

SiliconTechLab Private Limited – Software Engineer Trainee — **June 2025 – January 2026**

Key Responsibilities	• Developed responsive web applications for enterprise and government projects using Angular, HTML5, CSS3, SCSS, Bootstrap, JavaScript and TypeScript. • Built reusable UI components and layouts for 3 screen sizes (desktop, tablet, mobile); resolved cross-browser compatibility issues across client projects. • Integrated REST APIs and improved page performance while working in Agile teams with Git.

PROJECTS

SiliconTechLab Pvt Ltd Website – Spring Boot + Angular

Roles and Responsibilities	• Designed and built a corporate website with an Angular frontend consuming Spring Boot REST APIs for dynamic data. • Created modular, reusable components with TypeScript, SCSS and Bootstrap to simplify maintenance. • Worked with backend and design teams to deliver a cross-browser-compatible application in Agile sprints.

Sukshma Gamma Website (SGI) – Frontend

Roles and Responsibilities	• Built and deployed a responsive website from scratch with HTML5, CSS3 and JavaScript, converting design mockups into functional pages. • Engineered reusable UI components that work across 3 device types: desktop, tablet and mobile. • Improved page load speed and accessibility through code optimization and responsive design practices.

ICMR – NIPCR Website (nipcr.icmr.gov.in) – Government Website

Roles and Responsibilities	• Developed and maintained pages and frontend components using WordPress, HTML5, CSS3, JavaScript, Bootstrap and jQuery. • Applied STQC and accessibility guidelines to meet government compliance standards. • Customized layouts, navigation and content sections; resolved UI, responsive and cross-browser issues in production.

PROFESSIONAL TRAINING

Spring Boot Bootcamp – Prath Tech Pvt. Ltd. — **Ongoing**

Topics Covered	• Covering Core Java, Spring Boot, Spring MVC, Spring Data JPA, REST APIs, PostgreSQL, Validation, Exception Handling, Swagger/OpenAPI, Maven, Git & GitHub, Layered Architecture and CRUD applications.

Java Full Stack Development – J Spiders, Bhubaneswar — **2025**

KEY ACHIEVEMENTS

Achievements	• Resolved STQC compliance and accessibility issues on the frontend of 2 government websites (ICMR – NIPCR, CMSS). • Took part in the security audit of the CMSS government website and completed 50% of the audit work. • Delivered 7 responsive, cross-browser-compatible websites for enterprise, corporate and government clients.
